1 About the Faculty of Engineering

The Faculty currently includes five engineering departments and two schools:

The Departments

Chemical Engineering
Civil Engineering and Applied Mechanics
Electrical and Computer Engineering
Mechanical Engineering
Mining and Materials Engineering

The Schools

Architecture
Urban Planning

The Faculty serves approximately 2,740 undergraduate students and 1,060 graduate students in a wide variety of academic programs.

Undergraduate programs leading to professional bachelor's degrees are offered in all engineering departments. These programs are designed to qualify graduates for immediate employment in a wide range of industries and for membership in the appropriate professional bodies. Additionally, a non-professional undergraduate degree is offered in the School of Architecture for those who plan to work in related fields not requiring professional qualification.

The curricula are structured to provide suitable preparation for those who plan to continue their education in postgraduate studies either at McGill or elsewhere. The professional degrees in Architecture and Urban Planning are offered at the master's level and are described in the *Graduate and Postdoctoral Studies Calendar* found at www.mcgill.ca/students/courses/calendars.

The academic programs are divided into required and complementary sections. The required courses emphasize those basic principles which permit graduates to keep abreast of progress in technology throughout their careers. Exposure to current technology is provided by the wide variety of complementary courses which allow students to pursue in depth a particular interest. For program details, refer to [section 12: Academic Programs](#).

The Engineering Internship Program provides engineering students with the opportunity to participate in four-, eight-, twelve- or sixteen-month paid work experiences. Details can be found at www.mcgill.ca/careers4engineers/students/internship. In addition, co-op programs are offered in Mining Engineering and in Materials Engineering.

Postgraduate programs leading to master's and doctoral degrees are offered in all sectors of the Faculty. Numerous areas of specialization are available in each of the departments and schools. All postgraduate programs, including the professional degree programs in Architecture and in Urban Planning, are described in the *Graduate and Postdoctoral Studies Calendar* found at www.mcgill.ca/students/courses/calendars.

5 About the the Faculty of Engineering (Under graduate)

Welcome to the Faculty of Engineering section of the Undergraduate Calendar.

The mission of the Faculty of Engineering is to contribute to the advancement of learning and to the socio-economic development of Quebec and Canada, through teach

Subhasis Ghoshal; B.C.E.(Jadavpur), M.S.(Missouri), Ph.D.(Carn. Mell)
(*William Dawson Scholar*)

Associate Dean (Student Affairs)

Andrew Kirk; B.Sc.(Brist.), Ph.D.(Lond.) (*William Dawson Scholar*)

Associate Dean (Research and Graduate Education)

Associate Dean (Academic Affairs)

7 Admission Requirements

The Faculty of Engineering offers programs leading to the degrees of B.Eng., B.S.E. and B.Sc.(Arch.). Enrolment in Engineering programs is limited. For detailed information on admissions requirements, see the *Undergraduate Admissions Guide 2010-11* at www.mcgill.ca/applying.

8 Student Progress

The length of the B.Eng., B.S.E. and B.Sc.(Arch.) programs vary depending on your program and basis of admission. You can find the curriculum for your program on the website of your department/school. See www.mcgill.ca/engineering/departments for links to department/school websites.

You must successfully complete the B.Eng., B.S.E., or B.Sc.(Arch.) programs within six years of entry. Candidates admitted to a lengthened program, or to a shortened program because of advanced standing, or who are participating in a work term or in the Engineering Internship Program (EIP), will have a correspondingly greater or lesser period in which to complete their program.

Extensions may be granted by the Committee on Standing in cases of serious medical problems or where other similarly uncontrollable factors have affected your progress.

9 Student Activities

The campus offers a wide variety of extracurricular activities for students. All are encouraged to participate. Many of these are organized within the Faculty under the auspices of the Engineering Undergraduate Society (EUS) or the Architectural Student Association (ASA). Both of these organizations publish handbooks describing their operations and the activities of various Faculty clubs and societies. All undergraduate students automatically become members of the EUS or the ASA, as appropriate.

10 Degrees and Programs Offered

Engineering Internship Program

Co-op Programs

Materials Engineering (B.Eng.)

Mining Engineering (B.Eng.)

General Engineering Program

General Engineering - Undeclared major (freshman year)

Major Programs

Architecture (B.Sc.)

Chemical Engineering (B.Eng.)

Civil Engineering (B.Eng.)

Computer Engineering (B.Eng.)

Electrical Engineering (B.Eng.)

Mechanical Engineering (B.Eng.)

Software Engineering (B.S.E.)

Honours Programs

Electrical Engineering (B.Eng.)

Mechanical Engineering (B.Eng.)

Internship students will receive an automatic extension for the completion of their studies.

International students are eligible (a few restrictions may apply).

For more information, see www.mcgill.ca/careers4engineers or send an email to careers4engineers@mcgill.ca.

Important Information:

- While on internship, you are expected to complete any deferrals you may have been granted, regardless of the location of the internship. If you do not write a deferred exam as scheduled, you will receive a final grade of J. The J grade will calculate as a failure in both TGPA and CGPA.
- International students must ensure that their health coverage remains in force during their internship.
- During your time as an intern, you are not considered to be in full-time status. Your government loans will become due and payable within the prescribed grace period (usually six months).
- If you officially accept an internship position but subsequently decline the position, you will no longer be eligible for the Engineering Internship Program.

12 Academic Programs

The programs and courses in the following pages have been approved for the 2010-11 session as listed, but the Faculty reserves the right to introduce changes as may be deemed necessary or desirable.

12.1 General Engineering Program

The General Engineering Program (GEP) is offered in addition to the Faculty of Engineering's majors (Chemical, Civil, Computer, Electrical, Materials, Mechanical, Mining, and Software Engineering). The GEP permits students with strong mathematics, physics and chemistry results in high school to pursue a common first year curriculum without declaring a particular major program at the time of application. The GEP spans one academic year only (Year 0), following which students enter into an engineering major program.

For more information about the General Engineering Program, see www.mcgill.ca/engineering/degrees/general.

12.1.1 Bachelor of Engineering (B.Eng.) - General Engineering - Undeclared (30 credits)

This is a 30-31 credit course of study for the first year of a Bachelor of Engineering degree for students who have not completed a Quebec CEGEP diploma. Upon successful completion of these requirements, students must transfer into a B.Eng. or B.S.E. program.

Year 0 (Freshman) Courses

(30-31 credits)

| | | |
|-----------|-----|--|
| CHEM 110 | (4) | General Chemistry 1 |
| CHEM 120 | (4) | General Chemistry 2 |
| FACC 100 | (1) | Introduction to the Engineering Profession |
| MATH 133 | (3) | Linear Algebra and Geometry |
| MATH 140* | (3) | Calculus 1 |
| MATH 141 | (4) | Calculus 2 |
| PHYS 131 | (4) | Mechanics and Waves |
| PHYS 142 | (4) | Electromagnetism and Optics |

* Students may take MATH 139 (Calculus) (4 credits) instead of MATH 140, but only with permission from the Department of Mathematics and Statistics.

Humanities and Social Sciences, Management Studies and Law

3 credits at the 200-level or higher from the following departments:

Anthropology (ANTH)

Economics (any 200- or 300-level course excluding ECON 208, ECON 217, ECON 227 and ECON 337)

History (HIST)

Philosophy (excluding PHIL 210 and PHIL 310)

Political Science (POLI)

Psychology (excluding PSYC 204 and PSYC 305, but including PSYC 100)

Religious Studies (RELG)

School of Social Work (SWRK)

Sociology (excluding SOCI 350)

OR one of the following:

| | | |
|-----------|-----|---|
| ARCH 350 | (3) | The Material Culture of Canada |
| BUSA 465* | (3) | Technological Entrepreneurship |
| ENVR 203 | (3) | Knowledge, Ethics and Environment |
| ENVR 400 | (3) | Environmental Thought |
| FACC 220 | (3) | Law for Architects and Engineers |
| FACC 500 | (3) | Technology Business Plan Design |
| FACC 501 | (3) | Technology Business Plan Project |
| INDR 294* | (3) | Introduction to Labour-Management Relations |
| MATH 338 | (3) | History and Philosophy of Mathematics |
| MATH 352 | (1) | Problem Seminar |
| MGCR 222* | (3) | Introduction to Organizational Behaviour |
| MRKT 360* | (3) | Marketing of Technology |
| ORGB 321* | (3) | Leadership |
| ORGB 423* | (3) | Human Resources Management |

*Note: Management courses have limited enrolment and registration dates. See Important Dates at: <http://www.mcgill.ca/importantdates/>

Students who successfully complete one or more Science Placement Exams will obtain credit(s) for the equivalent(s), i.e., CHEM 110, CHEM 120, MATH 140, MATH 141, MATH 133, PHYS 131, PHYS 142. Please see <http://www.mcgill.ca/student-records/exam/placement> for information on Science Placement Exams.

12.2 School of Architecture

12.2.1 Location

Macdonald-Harrington Building, Room 201
815 Sherbrooke Street West
Montreal, Quebec H3A 2K6

Telephone: 514-398-6700

Fax: 514-398-7372

Website: www.mcgill.ca/architecture

12.2.2 About the School of Architecture

The School of Architecture at McGill University was founded in 1896. Our mission is to educate professionals who will contribute to the socio-economic and cultural development of Quebec, Canada and the broader global community through responsible participation in the process of the design, construction and interpretation of the built environment.

The School offers the non-professional B.Sc.(Arch.) program, the M.Arch. (Professional) program, and post-professional research programs, including the M.Arch. (Post-professional) and Ph.D.

12.2.3 Architectural Certification in Canada

In Canada, all provincial associations recommend a degree from an accredited professional de

two types of accredited degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a five-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master's degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

Since all provincial associations in Canada recommend any applicant for licensure to have graduated from a CACB-accredited program, obtaining such a degree is an essential aspect of preparing for the professional practice of architecture. While graduation from a CACB-accredited program does not assure registration, the accrediting process is intended to verify that each accredited program substantially meets those standards that, as a whole, comprise an appropriate education for an architect.

12.2.4 Programs of Study

Students in the B.Sc.(Arch.) program who intend to proceed to the professional degree must satisfy certain minimum requirements. Students must

- complete the B.Sc.(Arch.) degree, including the series of required and complementary courses stipulated for professional studies, with a minimum CGPA of 3.00;
- submit a portfolio of work executed in the sequence of six design studios, as well as samples of professional and personal work;
- complete the minimum period of relevant work experience according to the current Work Experience Guidelines (see www.mcgill.ca/architecture/bboard/bscmai/workexperience).

Further information on the M.Arch. (Professional) program and application procedures is available at www.mcgill.ca/architecture.

12.2.4.1 Student Exchanges

A limited number of qualified students may participate in an exchange with schools of architecture at other universities which have agreements with the McGill School of Architecture, for a maximum of one term in the second year of the B.Sc.(Arch.) program. These include the following: Università Iuav di Venezia (Venice, Italy); Fakultät für Raumplanung und Architektur, Technische Universität Wien (Vienna, Austria); Institut Supérieur d'Architecture, Saint-Luc Bruxelles (Brussels, Belgium); École Nationale Supérieure d'architecture de Grenoble (Grenoble, France); École Nationale Supérieure d'architecture de Clermont-Ferrand (Clermont-Ferrand, France); Facoltà di Architettura Civile Politecnico di Milano (Boviso) (Milan, Italy); The Royal Danish Academy of Fine Arts, School of Architecture (Copenhagen, Denmark).

12.2.5 Ancillary Academic Facilities

Laboratories and Workshops

Architectural Workshops - David Speller, Technician

Communications Laboratory, including Photo Lab - Carrie Henzie, Media Technician

Computers in Architecture Laboratories - Professor Aaron Sprecher

Library

Blackader-Lauterman Library of Architecture and Art, located in the Redpath Library - Marilyn Berger

Collections

Visual Resources Collection, including slides, film, video and other materials - Dr. Annmarie Adams

The John Bland Canadian Architecture Collection, housed in the Blackader-Lauterman Library - Ann Marie Holland, Preservations Librarian

Orson Wheeler Architectural Model Collection - Professor Pieter Sijpkens

Materials Resource Centre - Dr. Avi Friedman

12.2.6 School of Architecture Faculty

Director

Michael Jemtrud

Emeritus Professors

Derek Drummond; B.Arch.(McG.), F.R.A.I.C., O.A.A. (*William C. Macdonald Emeritus Professor of Architecture*)

Radoslav Zuk; B.Arch.(McG.), M.Arch.(MIT), D.Sc.(Ukr. Acad. Art), F.R.A.I.C., F.R.S.A., F.A.R.C., O.A.Q., O.A.A.

Professors

Annmarie Adams; B.A.(McG.), M.Arch., Ph.D.(Calif., Berk.), M.R.A.I.C. (*William C. Macdonald Professor of Architecture*)

Vikram Bhatt; N.Dip.Arch.(Ahmedabad), M.Arch.(McG.), M.R.A.I.C.

Avi Friedman; B.Arch.(Technion), M.Arch.(McG.), Ph.D.(Montr.), O.A.Q., I.A.A.

Electives

6 credits of elective courses outside the School of Architecture must be completed, subject to approval by the student adviser.

Revision, Fall 2010. End of re vision.

12.3 Department of Chemical Engineering

12.3.1 Location

M.H. Wong Building, Room 3060
3610 University Street
Montreal, Quebec H3A 2B2

Telephone: 514-398-4494

Fax: 514-398-6678

Website: www.mcgill.ca/chemeng

12.3.2 About the Department of Chemical Engineering

The central purpose of engineering is to pursue solutions to technological problems in order to satisfy the needs and desires of society. Chemical engineers are trained to solve the kinds of problems that are typically found in the "chemical process industries", which include the chemical manufacturing, plastics,

water treatment, pulp and paper, petroleum refining, ceramics, and paint industries as well as substantial portions of the food processing, textile, nuclear energy, biochemical, biomedical and pharmaceutical industries. The technological problems and opportunities in these industries are often closely linked to social, economic and environmental concerns. For this reason, practitioners of chemical engineering often deal with these questions when they are working in management, pollution abatement, product development, marketing and equipment design.

By means of complementary courses, students can also obtain further depth in technical areas and breadth in non-technical subjects. Some students elect to complete a minor in biotechnology, management, materials engineering, computer science, environmental engineering or chemistry.

The solution to many environmental problems requires an understanding of technological principles. A chemical engineering degree provides an ideal background. In addition to relevant material learned in the core program, a selection of environmental complementary courses and minor programs is available. The involvement of many chemical engineering staff members in environmental research provides the opportunity for undergraduate students to carry out research projects in this area.

The curriculum also provides the preparation necessary to undertake postgraduate studies leading to the M.Eng. or Ph.D. degrees in chemical engineering. Students completing this curriculum acquire a broad, balanced education in the natural sciences with the accent on application. Thus, for those who do not continue in chemical engineering, it provides an exceptionally balanced education in applied science. For others, it will form the basis of an educational program that may continue with a variety of studies such as business administration, medicine or law. Versatility is, then, one of the most valuable characteristics of the graduate of the chemical engineering program.

12.3.3 Academic Program

The Chemical Engineering Program comprises 140-141 credits (111 credits for those who completed the Quebec CEGEP program in Pure and Applied Sciences). Certain students who take advantage of summer session courses can complete the program in three calendar years.

In some cases students from university science disciplines have sufficient credits to complete the requirements for the B.Eng. (Chemical) program in two years. Those concerned should discuss this with their adviser.

Students must obtain a grade of C or better in all core courses. Fam in t1 0 0 lene'165.199.527 587.62 7

Associate Professors

Sasha Omano

Total program credit weight 112-115 credits.

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels and Science Placement Exams, see <http://www.mcgill.ca/engineering/student/sao/newstudents/credit> and select your term of admission.

Technical Complementaries

9 credits

The purpose of this requirement is to provide students with an area of specialization within the broad field of chemical engineering. Alternatively, some students use the technical complementaries to increase the breadth of their chemical engineering training.

At least two courses (4-7 credits) must be chosen from the list below. The remaining course(s) (2-5 credits) may be taken from other suitable undergraduate courses in the Faculty of Engineering, with departmental permission.

*Students may choose only one course in each of the following sets:

CHEE 494 or CHEE 495 or CHEE 496

CHEE 563 or MECH 563

| | | |
|-----------|-----|--|
| CHEE 595 | (3) | Energy Recovery, Use, & Impact |

Complementary Courses

21 credits consisting of:

Technical Complementary Courses

15 credits from List A and List B

Complementary Studies

6 credits from Group A and Group B

List A - Design Technical Complementaries

6-15 credits from the following:

| | | |
|----------|-----|---|
| CIVE 416 | (3) | Geotechnical Engineering |
| CIVE 421 | (3) | Municipal Systems |
| CIVE 428 | (3) | Water Resources and Hydraulic Engineering |
| CIVE 430 | (3) | Water Treatment and Pollution Control |
| CIVE 462 | (3) | Design of Steel Structures |
| CIVE 463 | (3) | Design of Concrete Structures |

List B - General Technical Complementaries

0-9 credits from the following, or from other suitable undergraduate or 500-level courses:

| | | |
|-------------------|-----|---|
| CIVE 433 | (3) | Urban Planning |
| CIVE 440 | (3) | Traffic Engineering |
| CIVE 446 | (3) | Construction Engineering |
| CIVE 451 | (3) | Geoenvironmental Engineering |
| CIVE 460 | (3) | Matrix Structural Analysis |
| CIVE 470 | (3) | Undergraduate Research Project |
| CIVE 512 | (3) | Advanced Civil Engineering Materials |
| CIVE 527CIVEtReno | (3) | Renovation and Preservation: Infrastructure |

| | | |
|----------|-----|---|
| CIVE 469 | (3) | Infrastructure and Society |
| ECON 225 | (3) | Economics of the Environment |
| ECON 347 | (3) | Economics of Climate Change |
| ENVR 201 | (3) | Society, Environment and Sustainability |
| GEOG 200 | (3) | Geographical Perspectives: World Environmental Problems |
| GEOG 203 | (3) | Environmental Systems |
| GEOG 205 | (3) | Global Change: Past, Present and Future |
| GEOG 302 | (3) | Environmental Management 1 |
| MECH 526 | (3) | Manufacturing and the Environment |
| MGPO 440 | (3) | Strategies for Sustainability |
| MIME 308 | (3) | Social Impact of Technology |
| PHIL 343 | (3) | Biomedical Ethics |
| RELG 270 | (3) | Religious Ethics and the Environment |
| SOCI 235 | (3) | Technology and Society |
| SOCI 312 | (3) | Sociology of Work and Industry |
| URBP 201 | (3) | Planning the 21st Century City |

Group B - Humanities and Social Sciences, Management Studies and Law
3 credits at the 200-levelity

Language Courses

If you are not proficient in a certain language, 3 credits will be given for one 6-credit course in that language.

However, 3 credits may be given for any language course that has a sufficient cultural component. You must have this course approved by a faculty adviser.

Revision, Fall 2010. End of revision.

12.5 Department of Electrical and Computer Engineering

12.5.1 Location

Department of Electrical and Computer Engineering
Undergraduate Programs Office
Lorne Trotter Building, Room 2060
3630 University Street
Montreal, Quebec H3A 2B2

Telephone: 514-398-3943
Fax: 514-398-4653
Website: www.mcgill.ca/ece

12.5.2 About the Department of Electrical and Computer Engineering

The Department of Electrical and Computer Engineering offers undergraduate degree programs in Electrical Engineering, Electrical Engineering (Honours), Computer Engineering, and Software Engineering. All programs provide students with a strong background in mathematics, basic sciences, engineering science, engineering design and complementary studies, in conformity with the requirements of the Canadian Engineering Accreditation Board (CEAB).

In addition to technical complementary courses, students in all three programs take general complementary courses in humanities and social sciences and/or management studies and law. These courses allow students to develop specific interests in areas such as psychology, economics, management or political science.

12.5.3 Department of Electrical and Computer Engineering Faculty

Chair

David V. Plant

Associate Chair, Operations

Benoit Boulet

Associate Chair, Undergraduate Studies

Jonathan P. Webb

Associate Chair, Graduate Studies

Mark Coates

Emeritus Professors

Eric L. Adler; B.Sc.(Lond.), M.A.Sc.(Tor.), Ph.D.(McG.), F.I.E.E.E., Eng.

Pierre R. Bélanger; B.Eng.(McG.), S.M., Ph.D.(MIT), F.I.E.E.E., Eng.

Maier L. Blostein; B.Eng., M.Eng.(McG.), Ph.D.(Ill.), F.I.E.E.E., Eng.

Clifford H. Champness; M.Sc.(Lond.), Ph.D.(McG.)

Gerry W.M9332M., Ph.F74653

Emeritus Professors

Nicholas C. Rumin; B.Eng., M.Sc., Ph.D.(McG.), Eng.

Professors

Peter E. Caines; B.A.(Oxf.), D.I.C., Ph.D.(Lond.), F.R.S.C., F.I.E.E.E., F.C.I.A.R. (*James McGill Professor*) (*Macdonald Professor*)

James Clark; B.A.Sc., Ph.D.(Br. Col.), *Associate Dean, Academic*

Frank Ferrie; B.Eng., Ph.D.(McG.)

2Jai8 G.)

Assistant Professors

Vamsy Chodavarapu; B.Eng.(India), M.S., Ph.D.(NYU)
 Anas Hamoui; M.Eng.(McG.), Ph.D.(Tor.)
 Odile Liboiron-Ladouceur; M.Sc., Ph.D.(Col.)
 Zetian Mi; B.A.Sc.(China), M.Sc.(Iowa), Ph.D.(Mich.)
 Sam Musallam; B.Sc., M.Sc., Ph.D.(Tor.)
 Michael Rabbat; B.S.(Ill.), M.S.(Texas), Ph.D.(Wis.)
 Martin Rochette; B.A., M.Eng., Ph.D.(Laval)
 Thomas Szkopek; B.A.Sc., M.A.Sc.(Tor.), Ph.D.(Calif.-LA)
 Mai Vu; M.S., Ph.D.(Stan.)

Associate Members

Gregory Dudek; B.Sc.(Qu.), M.Sc., Ph.D.(Tor.)
 Alan C. Evans; M.Sc.(Surrey), Ph.D.(Leeds)
 William R. Funnell; M.Eng., Ph.D.(McG.)
 Henrietta L. Galiana; M.Eng., Ph.D.(McG.)
 Jean Gotman; M.E.(Dart.), Ph.D.(McG.)
 David Juncker; Ph.D.(Neuchatel)
 Robert E. Kearney; M.Eng., Ph.D.(McG.)
 Xue Liu; B.S., M.Eng.(Tsinghua), Ph.D.(Ill.)
 Nathaniel J. Quitoriano; B.S.(Calif.), Ph.D.(MIT)

Adjunct Professors

Ray Bartnikas
 Eric Boisvert
 Charalambos Charalambous
 Robert DiRaddo
 Danny Grant
 Cedric Guss
 Cheng K. Jen
 Irene Leszkowicz
 Miguel Marin
 Douglas O'Shaughnessy
 Katarzyna Radecka
 Farouk Rizk
 Anthony Rodolakis
 Robert Sabourin
 Leszek Szczecinski
 Kenneth D. Wagner

12.5.4 Bachelor of Engineering (B.Eng.) - Electrical Engineering (109 credits)

Revision, Fall 2010. Start of re vision.

The program gives students a broad understanding of the key principles that are responsible for the extraordinary advances in the technology of computers, micro-electronics, automation and robotics, telecommunications and power systems. These areas are critical to the development of our industries and, more

generally, to our economy. A graduate of this program is exposed to all basic elements of electrical engineering and can function in any of our client industries. This breadth is what distinguishes an engineer from, say, a computer scientist or physicist.

In addition to technical complementary courses, students in the Electrical Engineering program take general complementary courses in social sciences, administrative studies and humanities. These courses allow students to develop specific interests in areas such as psychology, economics, management or political science.

Total program credit weight: 109-110 credits.

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels and Science Placement Exams, see

<http://www.mcgill.ca/engineering/student/sao/newstudents/> and select your term of admission.

| FACC 220 | (3) | Law for Architects and Engineers |
| FACC 500 | (3) | Technology Business Plan Design |
| FACC 501 | (3) | Technology Business Plan Project |
| INDR 294* | (3) | Introduction to Labour-Management Relations |
| MATH 338 | (3) | History and Philosophy of Mathematics |
| MGCR 222* | (3) | Introduction to Organizational Behaviour |
| MGCR 352* | (3) | Marketing Management I |
| ORGB 321* | (3) | Leadership |
| ORGB 423* | (3) | Human Resources Management |

*Note: Management courses have limited enrolment and registration dates. See Important Dates at <http://www.mcgill.ca/importantdates>.

Language Courses

If you are not proficient in a certain language, 3 credits will be given for one 6-credit course in that language.

However, 3 credits may be given for any language course that has a sufficient cultural component. You must have this course approved by a faculty adviser.

Enhanced Power Concentration

(Students following this program must complete 15 credits of technical complementary courses.)

The Institute for Electrical Power Engineering was recently established as a province-wide centre for electrical power engineering education. It is funded by industry, mostly Hydro-Québec, and provides a comprehensive program and state-of-the-art laboratory facilities, and a point of contact between industry and universities involved in power engineering.

Note: This program is open to students in the regular Electrical Engineering program only.

Here are some benefits of the concentration:

- a complete and up-to-date final-year program in electrical power engineering, with industry-sponsored and supported courses

- access to industry-sponsored projects, internships and new employment opportunities

ELIGIBILITY CRITERIA

To be considered in September 2010, the applicant must

- be registered in the B.Eng. program (regular Electrical Engineering);
- have a cumulative GPA of at least 2.70
- have completed or be registered in ECSE 361 (Power Engineering);
- be able to complete the degree requirements by Spring 2011;
- agree to follow the curriculum requirements set out below.

SELECTION CRITERIA

The number of students selected, expected to be between five and ten, will be the subject of a specific agreement between the University and the Institute. Selection criteria to the Institute will be based on CGPA and on the curriculum vitae. The selection process for the scholarship may involve an interview with the committee presided by Hydro-Québec. There is a possibility of an internship with Hydro-Québec.

CURRICULUM REQ

- Students from CEGEP will be admitted, on the basis of their grades, at the start of the third term.
- Students from outside Quebec will be admitted, on the basis of their grades, at the start of the fifth term.

To remain in the Honours program and to be awarded the Honours degree, a student must have completed at least 14 credits in each term since entering Electrical and Computer Engineering, except for the final two terms of their degree, and maintained a CGPA of at least 3.30 since entering Electrical and Computer Engineering. In either of their final two full terms (i.e., Fall and Winter, or Winter and Fall) students may drop below 14 credits, provided the combined load for the two terms is at least 16 credits. For more information, please contact the Departmental office at 514-398-3943.

Required Year 0 (Freshman) Courses

29 credits

Note: Students in the Honours Electrical Engineering program complete the Year 0 (Freshman) courses before entering the Honours program, as explained above.

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels and Science Placement Exams, see <http://www.mcgill.ca/engineering/student/sao/newstudents/and> select your term of admission.

Complementary Courses

17-18 credits

Technical Complementaries

9 credits chosen from 500-level ECSE courses OR 6 credits chosen from 500-level ECSE courses and 3 credits chosen from the following list of 400-level courses (no more than one 400-level course can be chosen as a technical complementary):

| | | |
|----------|-----|--|
| ECSE 425 | (3) | Computer Organization and Architecture |
| ECSE 427 | (3) | Operating Systems |
| ECSE 451 | (3) | EM Transmission and Radiation |

Laboratory Complementaries

2-3 credits from the following:

| | | |
|----------|-----|--------------------------------------|
| ECSE 426 | (3) | Microprocessor Systems |
| ECSE 431 | (3) | Introduction to VLSI CAD |
| ECSE 435 | (3) | Mixed-Signal Test Techniques |
| ECSE 436 | (3) | Signal Processing Hardware |
| ECSE 450 | (3) | Electromagnetic Compatibility |
| ECSE 485 | (2) | IC Fabrication Laboratory |
| ECSE 486 | (2) | Power Laboratory |
| ECSE 487 | (2) | Computer Architecture Laboratory |
| ECSE 488 | (2) | High Frequency Laboratory |
| ECSE 489 | (2) | Telecommunication Network Laboratory |
| ECSE 490 | (2) | Digital Signal Processing Laboratory |
| ECSE 491 | (2) | Communication Systems Laboratory |
| ECSE 492 | (2) | Optical Communications Laboratory |
| ECSE 493 | (2) | Control and Robotics Laboratory |

Complementary Studies

6 credits from Group A and Group B

Group A - Impact of Technology on Society

3 credits from the following:

| | | |
|----------|-----|---|
| ANTH 212 | (3) | Anthropology of Development |
| BTEC 502 | (3) | Biotechnology Ethics and Society |

Language Courses

If you are not proficient in a certain language, 3 credits will be given for one 6-credit course in that language.

However, 3 credits may be given for any language course that has a sufficient cultural component. You must have this course approved by a faculty adviser.

Revision, Fall 2010. End of revision.

12.5.6 Bachelor of Engineering (B.Eng.) - Computer Engineering (110 credits)

Revision, Fall 2010. Start of revision.

The Computer Engineering program provides students with greater depth and breadth of knowledge in the hardware and software aspects of computers. Students are exposed to both theoretical and practical issues of both hardware and software in well-equipped laboratories. Although the program is designed to meet the growing demands by industry for engineers with a strong background in modern computer technology, it also provides the underlying depth for graduate studies in all fields of Computer Engineering.

In addition to technical complementary courses, students in the program take general complementary courses in social sciences, management studies and humanities. These courses allow students to develop specific interests in areas such as psychology, economics, management or political science.

Total program credit weight: 110-114 credits.

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels and Science Placement Exams, see

www.mcgill.ca/engineering/student/sao/newstudents/ and select your term of admission.

Complementary Courses

17-21 credits

Basic Science Complementary Courses (for CEGEP students only)

0-3 credits

Students from CEGEP are required to complete one 3-credit course at the 200-level or higher, chosen from the following science departments, approved by the Undergraduate Programs Office in the Department of Electrical and Computer Engineering:

Atmospheric and Oceanic Sciences (ATOC)

Biology (BIOL)

Chemistry (CHEM)

Earth and Planetary Sciences (EPSC)

Earth System Science (ESYS)

Physics (PHYS)

Technical Complementaries

9 credits from List A and List B

The course chosen from List A is meant to enhance the body of knowledge; the courses chosen from List B are to provide breadth.

LIST A

3 credits from the following:

| | | |
|----------|-----|-------------------------------|
| ECSE 424 | (3) | Human-Computer Interaction |
| ECSE 428 | (3) | Software Engineering Practice |
| ECSE 431 | (3) | Introduction to VLSI CAD |

LIST B

6 credits from the following:

| | | |
|----------|-----|---|
| COMP 424 | (3) | Artificial Intelligence |
| ECSE 404 | (3) | Control Systems |
| ECSE 411 | (3) | Communications Systems 1 |
| ECSE 412 | (3) | Discrete Time Signal Processing |
| ECSE 420 | (3) | Parallel Computing |
| ECSE 421 | (3) | Embedded Systems |
| ECSE 422 | (3) | Fault Tolerant Computing |
| ECSE 429 | (3) | Software Validation |
| ECSE 436 | (3) | Signal Processing Hardware |
| ECSE 443 | (3) | Introduction to Numerical Methods in Electrical Engineering |
| ECSE 450 | (3) | Electromagnetic Compatibility |
| ECSE 530 | (3) | Logic Synthesis |
| ECSE 532 | (3) | Computer Graphics |
| ECSE 548 | (3) | Introduction to VLSI Systems |

Laboratory Complementaries

2-3 credits from the following:

| | | |
|----------|-----|----------------------------------|
| ECSE 434 | (2) | Microelectronics Laboratory |
| ECSE 436 | (3) | Signal Processing Hardware |
| ECSE 487 | (2) | Computer Architecture Laboratory |

| | | |
|----------|-----|---|
| ANTH 212 | (3) | Anthropology of Development |
| BTEC 502 | (3) | Biotechnology Ethics and Society |

Complementary Courses

15-24 credits

Basic Science Complementary Courses (for CEGEP students only)

0-6 credits

Students from CEGEP are required to complete two 3-credit courses at the 200-level or higher, chosen from the following science departments, approved by the Undergraduate Programs Office in the Department of Electrical and Computer Engineering:

Atmospheric and Oceanic Sciences (ATOC)

Biology (BIOL)

Chemistry (CHEM)

Earth and Planetary Sciences (EPSC)

Earth System Science (ESYS)

Physics (PHYS)

Technical Complementaries

9-12 credits

Not all courses listed are offered in a given year. See the course listing at <http://www.mcgill.ca/students/courses/calendars/search> to know when a course is offered.

List A

3-4 credits from the following:

| | | |
|------------|-----|--|
| COMP 330 | (3) | Theoretical Aspects: Computer Science |
| COMP 350 | (3) | Numerical Computing |
| COMP 409 | (3) | Concurrent Programming |
| COMP 424 | (3) | Artificial Intelligence |
| COMP 520 | (4) | Compiler Design |
| COMP 535* | (3) | Computer Networks 1 |
| COMP 557** | (3) | Fundamentals of Computer Graphics |
| COMP 566 | (3) | Discrete Optimization 1 |
| COMP 575 | (3) | Fundamentals of Distributed Algorithms |
| ECSE 404 | (3) | Control Systems |
| ECSE 413 | (3) | Communications Systems 2 |
| ECSE 414* | (3) | Introduction to Telecommunication Networks |
| ECSE 421 | (3) | Embedded Systems |
| ECSE 422 | (3) | Fault Tolerant Computing |
| ECSE 504 | (3) | Sampled Data Control |
| ECSE 529 | (3) | Computer and Biological Vision |
| ECSE 532** | (3) | Computer Graphics |

*Students choose either COMP 535 or ECSE 414.

**Students choose either COMP 557 or ECSE 532.

List B

6-8 credits from the following:

| | | |
|----------|-----|--|
| ECSE 323 | (5) | Digital System Design |
| ECSE 411 | (3) | Communications Systems 1 |
| ECSE 412 | (3) | Discrete Time Signal Processing |
| ECSE 424 | (3) | Human-Computer Interaction |
| ECSE 425 | (3) | Computer Organization and Architecture |
| ECSE 426 | (3) | Microprocessor Systems |
| ECSE 530 | (3) | Logic Synthesis |

Complementary Studies

6 credits

3 credits selected from the Impact of Technology on Society course list below.

3 credits selected from the Humanities and Social Sciences, Management Studies and Law course lists below.

Note: Out-of-province (high school) students completing the basic science requirements for students entering outside Quebec need an additional 3 credits of pre-engineering Humanities and Social Sciences (HSS) courses. Please contact the Faculty of Engineering for information.

Group A - Impact of Technology on Society

3 credits from the following:

| | | |
|----------|-----|----------------------------------|
| ANTH 212 | (3) | Anthropology of Development |
| BTEC 502 | (3) | Biotechnology Ethics and Society |
| CHEE 430 | (3) | Technology Impact Assessment |
| CIVE 469 | (3) | Infrastructure and Society |
| ECON 225 | (3) | Economics of the Environment |

Professors

Eliot Fried; A.B.(Calif., Berk.), M.S., Ph.D.(Cal. Tech.) (*Tier 1 Canada Research Chair*)

Wagdi G. Habashi; B.Eng., M.Eng.(McG.), Ph.D.(C'nell), P.Eng., F.C.A.E., F.A.S.M.E., F.R.S.C. (*NSERC-J. Armand Bombardier-Bell-Helicopter Industrial Research Chair in Multidisciplinary CFD*)

John H.S. Lee; B.Eng.(McG.), M.Sc.(MIT), Ph.D.(McG.), P.Eng. F.R.S.C.

George Haller; M.S.(Budapest Tech.), Ph.D.(Cal. Tech.) (*Faculty of Engineering Distinguished Professor*)

Dan Mateescu; M.Eng.(Univ-Poli. Bucharest), Ph.D.(Rom. Acad. Sci.), Doctor Honoris Causa(Univ-Poli.Bucharest), F.C.A.S.I., A.F.A.I.A.A., Erskine Fellow(Cant.)

Arun K. Misra; B.Tech.(IIT, Kharagpur), Ph.D.(Br. Col.), P.Eng., F.A.A.S., A.F.A.I.A.A. (*Thomas Workman Professor of Mechanical Engineering*)

Luc Mongeau; B.S.M.E., M.S.(École Poly., Montr.), Ph.D.(Penn. St.) (*Tier 1 Canada Research Chair*), Associate Dean, Academic Affairs, Director, Graduate Admissions and Scholarships

Christophe Pierre; B.Eng.(École Centrale, Paris), M.Sc.(Prin.), Ph.D.(Duke) (*Tier 1 Canada Research Chair*), Dean, Faculty of Engineering

Associate Professors

Luca Cortelezzi; M.Sc., Ph.D.(Cal. Tech.)

David L. Frost; B.A.Sc.(Br. Col.), M.S., Ph.D.(Cal. Tech.), P.Eng., *Graduate Progr*

Adjunct Professors/Course Lecturers

R. Sumner

D. Zorbas

12.6.4 Bachelor of Engineering (B.Eng.) - Mechanical Engineering (112 credits)

Revision, Fall 2010. Start of revision.

To prepare the mechanical engineer for a wide range of career possibilities, there is a heavy emphasis in our curriculum on the fundamental analytical disciplines. This is balanced by a sequence of experimental and design engineering courses which include practice in design, manufacturing and experimentation. In these courses students learn how to apply their analytical groundwork to the solution of practical problems.

Special interests are satisfied by selecting appropriate complementary courses from among those offered with a specific subject concentration, such as management, industrial engineering, computer science, controls and robotics, bio-engineering, aeronautics, combustion, systems engineering, etc.

Total program credit weight: 112-118 credits.

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels and Science Placement Exams, see <http://www.mcgill.ca/engineering/student/sao/newstudents> and select your term of admission.

| | | |
|----------|-----|-----------------------------|
| CHEM 110 | (4) | General Chemistry 1 |

| MECH 430 | (3) | Fluid Mechanics 2 |
| MECH 463D1 | (3) | Mechanical Engineering Project |
| MECH 463D2 | (3) | Mechanical Engineering Project |

Complementary Courses

15 credits

6 credits at the 300-level or higher, chosen from Mechanical Engineering courses (subject code MECH). One of these two courses (3 credits) must be from the following list:

| | | |
|-----------|-----|---|
| CHEE 563* | (3) | Biofluids and Cardiovascular Mechanics |
| MECH 513 | (3) | Control Systems |
| MECH 528 | (3) | Product Design |
| MECH 529 | (3) | Discrete Manufacturing Systems |
| MECH 530 | (3) | Mechanics of Composite Materials |
| MECH 532 | (3) | Aircraft Performance, Stability and Control |
| MECH 535 | (3) | Turbomachinery and Propulsion |
| MECH 536 | (3) | Aircraft Structures |
| MECH 541 | (3) | Kinematic Synthesis |
| MECH 543 | (3) | Design with Composite Materials |
| MECH 544 | (3) | Processing of Composite Materials |
| MECH 554 | (3) | Microprocessors for Mechanical Systems |
| MECH 557 | (3) | Mechatronic Design |
| MECH 563* | (3) | Biofluids and Cardiovascular Mechanics |
| MECH 573 | (3) | Mechanics of Robotic Systems |

| | | |
|----------|-----|-------------------------------|
| MECH 577 | (3) | Optimum Design |
| MECH 593 | (3) | Design Theory and Methodology |

*Students select either CHEE 563 or MECH 563

3 credits chosen from courses at the 300-level or higher (approved by the Department) in the Faculty of Engineering (including MECH courses) or from courses in the Faculty of Science, including MATH courses.

Complementary Studies

6 credits

Group A - Impact of Technology on Society

3 credits from the following:

| | | |
|----------|--------|----------------------------------|
| ANTH 212 | (3) | Anthropology of Development |
| BTEC 502 | (3) | Biotechnology Ethics and Society |
| CHEE 430 | (3) | Technology Impact Assessment |
| | (3)(3) | Infrastructure and Society |

| | | |

| FACC 220 | (3) | Law for Architects and Engineers |
| FACC 500 | (3) | Technology Business Plan Design |
| FACC 501 | (3) | Technology Business Plan Project |
| INDR 294* | (3) | Introduction to Labour-Management Relations |
| MATH 338 | (3) | History and Philosophy of Mathematics |
| MGCR 222* | (3) | Introduction to Organizational Behaviour |
| MGCR 352* | (3) | Marketing Management 1 |
| ORGB 321* | (3) | Leadership |
| ORGB 423* | (3) | Human Resources Management |

*Note: Management courses have limited enrolment and registration dates. See Important Dates at <http://www.mcgill.ca/importantdates>.

Language Courses

If you are not proficient in a certain language, 3 credits will be given for one 6-credit course in that language.

However, 3 credits may be given for any language course that has a sufficient cultural component. You must have this course approved by a faculty adviser.

Elective Courses

0-6 credits

Students from Quebec CEGEPs must take 6 credits of courses at the 200-level or higher from the following faculties/schools:

Desautels Faculty of Management

Faculty of Agricultural and Environmental Sciences

Faculty of Arts

Faculty of Engineering

Faculty of Religious Studies

Faculty of Science

Schulich School of Music

Typical Program of Study

Students entering the program from CEGEP follow a different curriculum than those entering from out of province. Students will be advised by the Department as to which courses they should select from the course lists above.

For a detailed curriculum, please see <http://www.mcgill.ca/mecheng/undergrad/curriculum>.

For all minors and concentrations, students should complete a Course Authorization FAA.mcgillr3 Tc1 0 0 1 67.52 276.363Mrb 0 0 1 N39600 0 thCcTj1 0 0 1 49 th.T3

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels and Science Placement Exams, see <http://www.mcgill.ca/engineering/student/sao/newstudents> and select your term of admission.

| PHYS 142 | (4) | Electromagnetism and Optics |

AND 3 credits selected from the approved list of courses in Humanities and Social Sciences, Management Studies and Law, listed below under Complementary Studies (Group B).

Required Non-Departmental Courses

27 credits

| | | |
|------------|-----|---|
| MECH 362 | (2) | Mechanical Laboratory 1 |
| MECH 383 | (3) | Applied Electronics and Instrumentation |
| MECH 403D1 | (3) | Thesis (Honours) |
| MECH 403D2 | (3) | Thesis (Honours) |
| MECH 404 | (3) | Honours Thesis 2 |
| MECH 419 | (4) | Advanced Mechanics of Systems |
| MECH 430 | (3) | Fluid Mechanics 2 |
| MECH 494 | (3) | Honours Design Project |

Complementary Courses

24 credits

3 credits from the following, chosen with the approval of either the thesis supervisor or the coordinator of the honours program, when a thesis supervisor has not yet been secured:

| | | |
|----------|-----|----------------------------------|
| MATH 327 | (3) | Matrix Numerical Analysis |
| MATH 381 | (3) | Complex Variables and Transforms |
| MATH 417 | (3) | Mathematical Programming |

6 credits from the following:

| | | |
|----------|-----|---|
| MECH 546 | (3) | Finite Element Methods in Solid Mechanics |
| MECH 562 | (3) | Advanced Fluid Mechanics |
| MECH 578 | (3) | Advanced Thermodynamics |

6 credits at the 300-level or higher, chosen from Mechanical Engineering courses (subject code MECH). One of these two courses (3 credits) must be from the following list:

| | | |
|-----------|-----|--|
| CHEE 563* | (3) | Biofluids and Cardiovascular Mechanics |
| MECH 513 | (3) | Control Systems |
| MECH 528 | (3) | Product Design |
| MECH 529 | (3) | Discrete Manufacturing Systems |
| MECH 530 | (3) | Mechanics of Composite Materials |

3 credits chosen from courses at the 300-level or higher (approved by the Department) in the Faculty of Engineering (including MECH courses) or from MIME 260 or from courses at the 300-level or higher in the Faculty of Science, including MATH courses.

Complementary Studies

6 credits

Group A - Impact of Technology on Society

3 credits from the following:

| | | |
|----------|-----|---|
| ANTH 212 | (3) | Anthropology of Development |
| BTEC 502 | (3) | Biotechnology Ethics and Society |
| CHEE 430 | (3) | Technology Impact Assessment |
| CIVE 469 | (3) | Infrastructure and Society |
| ECON 225 | (3) | Economics of the Environment |
| ECON 347 | (3) | Economics of Climate Change |
| ENVR 201 | (3) | Society, Environment and Sustainability |
| GEOG 200 | (3) | Geographical Perspectives: World Environmental Problems |
| GEOG 203 | (3) | Environmental Systems |
| GEOG 205 | (3) | Global Change: Past, Present and Future |
| GEOG 302 | (3) | Environmental Management 1 |
| MECH 526 | (3) | Manufacturing and the Environment |

| MIME 308 | (3) | Social Impact of Technology |
| PHIL 343 | (3) | Biomedical Ethics |
| RELG 270 | (3) | Religious Ethics and the Environment |
| SOCI 235 | (3) | Technology and Society |
| SOCI 312 | (3) | Sociology of Work and Industry |
| URBP 201 | (3) | Planning the 21st Century City |

Group B: Humanities and Social Sciences, Management Studies and Law

3 credits at the 200-level or higher from the following departments:

Anthropology (ANTH)

Economics (any 200- or 300-level course excluding ECON 208, ECON 217, ECON 227 and ECON 337)

History (HIST)

Philosophy (excluding PHIL 210 and PHIL 310)

Political Science (POLI)

Psychology (excluding PSYC 204 and PSYC 305, but including PSYC 100)

Religious Studies (RELG)

School of Social Work (SWRK)

Sociology (excluding SOCI 350)

OR one of the following:

| | | |
|-----------|-----|-----------------------------------|
| ARCH 528 | (3) | History of Housing |
| BUSA 465* | (3) | Technological Entrepreneurship |
| ENVR 203 | (3) | Knowledge, Ethics and Environment |
| ENVR 400 | (3) | Environmental Thought |
| FACC 220 | (3) | Law for Architects and Engineers |

| | | |
|-----------|-----|---|
| FACC 500 | (3) | Technology Business Plan Design |
| FACC 501 | (3) | Technology Business Plan Project |
| INDR 294* | (3) | Introduction to Labour-Management Relations |
| MA | (3) | History and Philosophy of Mathematics |

MECH 536 (3) Aircraft Structures

3-6 credits from the following:

| | | |
|----------|-----|--|
| MECH 531 | (3) | Aeroelasticity |
| MECH 537 | (3) | High-Speed Aerodynamics |
| MECH 538 | (3) | Unsteady Aerodynamics |
| MECH 539 | (3) | Computational Aerodynamics |
| MECH 565 | (3) | Fluid Flow and Heat Transfer Equipment |

Bachelor of Engineering (B.Eng.) - Honour s Mechanical Engineering - Aer

Complementary Courses

9-10 credits from the following:

| | | |
|----------|-----|--|
| ARCH 515 | (3) | Sustainable Design |
| CHEE 453 | (4) | Process Design |
| MECH 497 | (3) | Value Engineering |
| MECH 526 | (3) | Manufacturing and the Environment |
| MECH 528 | (3) | Product Design |
| MECH 530 | (3) | Mechanics of Composite Materials |
| MECH 541 | (3) | Kinematic Synthesis |
| MECH 543 | (3) | Design with Composite Materials |
| MECH 554 | (3) | Microprocessors for Mechanical Systems |
| MECH 557 | (3) | Mechatronic Design |
| MECH 565 | (3) | Fluid Flow and Heat Transfer Equipment |
| MECH 576 | (3) | Geometry in Mechanics |
| MECH 577 | (3) | Optimum Design |
| MECH 579 | (3) | Multidisciplinary Design Optimization |
| MECH 593 | (3) | Design Theory and Methodology |

12.6.9 Bachelor of Engineering (B.Eng.) - Honours Mechanical Engineering - Design (15 credits)

Students in this concentration take five courses in the area of design, including the completion of an interdisciplinary project.

Students should complete a Course Authorization Form, available from the Student Affairs Office (Engineering Student Center) or from the Undergraduate Program Secretary, indicating their intention to take the concentration.

Total concentration credit weight: 15-16 credits.

Required Courses

6 credits

| | | |
|----------|-----|------------------------------------|
| MECH 498 | (3) | Interdisciplinary Design Project 1 |
| MECH 499 | (3) | Interdisciplinary Design Project 2 |

Complementary Courses

9-10 credits from the following:

| | | |
|----------|-----|-----------------------------------|
| ARCH 515 | (3) | Sustainable Design |
| CHEE 453 | (4) | Process Design |
| MECH 497 | (3) | Value Engineering |
| MECH 526 | (3) | Manufacturing and the Environment |
| MECH 528 | (3) | Product Design |
| | (3) | Mechanics of Composite Materials |

| | | |
|----------|-----|---------------------------------------|
| MECH 577 | (3) | Optimum Design |
| MECH 579 | (3) | Multidisciplinary Design Optimization |
| MECH 593 | (3) | Design Theory and Methodology |

12.6.10 Bachelor of Engineering (B.Eng.) - Mechanical Engineering - Mechatronics (18 credits)

Students in this concentration take six courses in the area of control, robotics and/or CAD/CAM.

Students should complete a Course Authorization Form, available from the Student Affairs Office (Engineering Student Center) or from the Undergraduate Program Secretary, indicating their intention to take the concentration.

Required Courses

12 credits

| | | |
|----------|-----|--|
| MECH 513 | (3) | Control Systems |
| MECH 554 | (3) | Microprocessors for Mechanical Systems |
| MECH 557 | (3) | Mechatronic Design |
| MECH 572 | (3) | Introduction to Robotics |

Complementary Courses

6 credits from the following:

| | | |
|----------|-----|------------------------------|
| MECH 528 | (3) | Product Design |
| MECH 541 | (3) | Kinematic Synthesis |

12.6.11 Bachelor of Engineering (B.Eng.) - Honours Mechanical Engineering - Mechatronics (18 credits)

Students in this concentration take six courses in the area of control, robotics and/or CAD/CAM.

Students should complete a Course Authorization Form, available from the Student Affairs Office (Engineering Student Center) or from the Undergraduate Program Secretary, indicating their intention to take the concentration.

Required Courses

12 credits

| | | |
|----------|-----|--|
| MECH 513 | (3) | Control Systems |
| MECH 554 | (3) | Microprocessors for Mechanical Systems |
| MECH 557 | (3) | Mechatronic Design |
| MECH 572 | (3) | Introduction to Robotics |

Complementary Courses

6 credits from the following:

| | | |
|----------|-----|------------------------------|
| MECH 528 | (3) | Product Design |
| MECH 541 | (3) | Kinematic Synthesis |
| MECH 573 | (3) | Mechanics of Robotic Systems |

12.7.3.1 About Materials Engineering**12.7.3.1.1 Materials Engineering (Co-op)**

The Materials Engineering degree is a cooperative program leading to a B.Eng. and includes formal industrial work periods. It is built on a strong background of mathematics, basic sciences, computer skills and applications, and specific engineering and design courses to provide up-to-date training in materials engineering. Students take core courses covering processing, fabrication, applications and performance of materials, namely metals, ceramics, polymers and composites. The program is fully accredited by the Canadian Engineering Accreditation Board (CEAB) and is designed to offer students exceptional training for employment in the field. The core courses are supplemented by complementary courses which provide a diverse selection of specialties for the graduating engineer. The course structure is reinforced with laboratory exercises. Graduates find employment in a wide range of industries, including the resource and manufacturing sectors. Students in the Co-op program benefit from practical learning experience gained from work-term employment in meaningful engineering jobs, as well as non-tangible learning experiences arising from the responsibilities required to obtain and successfully complete the work terms.

Regarding the Co-op program fees, an amount of \$200 will be billed during ten consecutive terms for a total amount of \$2,000 before graduation. These fees cover expenses directly related to the operation of the Co-op program. Students must register for each of their industrial training courses and pay the associated fees by the Minerva Course Change (drop/add) deadlines or late fees will apply. Before registering for any work term course, students must contact the Materials Co-op Liaison Officer for approval.

12.7.3.1.2 Student Advising

Students entering this program must plan their schedule of studies in consultation with the departmental adviser, Prof. Richard Chromik.

12.7.3.2 About Mining Engineering**12.7.3.2.1 Mining Engineering (Co-op)**

McGill is proud to be the host of the oldest mining engineering program in Canada, which started in 1871. The program is known for the excellence of its courses as well as the training it provides in mining technology, mineral economics and mine design. The minerals industry is currently going through an expansion phase that has never been seen before. This is highly beneficial to both our graduate and undergraduate students. Tremendous career opportunities are available in Canada and around the world. There have been rapid technical developments in recent years, presenting a challenge to the creative student with a strong interest in engineering and a taste for innovative solutions.

The Department offers a co-operative program leading to the accredited B.Eng. degree in Mining Engineering. It includes four paid industrial work terms. The Co-op program is offered in collaboration with the mining engineering program at École Polytechnique in Montreal. Students registered at McGill are required to take a series of mining courses at École Polytechnique in the latter part of the program. These courses are designated in the course outline under the Subject Code MPMC.

Students must register for each work term (MIME 290, MIME 291, MIME 392, MIME 494) and pay associated fees by the Course Change (add/drop) registration deadline or else late fees will apply. Before registering for any work term course, students must contact the Mining Program Manager for approval.

Language Courses

If you are not proficient in a certain language, 3 credits will be given for one 6-credit course in that language.

However, 3 credits may be given for any language course that has a sufficient cultural component. You must have this course approved by a faculty adviser.

Revision, Fall 2010. End of revision.

12.8 School of Urban Planning

12.8.1 Location

Macdonald-Harrington Building, Room 400
815 Sherbrooke Street West
Montreal, Quebec H3A 2K6

Telephone: 514-398-4075

Fax: 514-398-8376

Email: admissions.planning@mcgill.ca

Website: www.mcgill.ca/urbanplanning

12.8.2 About the School of Urban Planning

Modern urban planning developed into a profession in the early decades of the 20th century, largely as a response to the appalling sanitary, social and economic conditions of rapidly developing industrial cities. Initially, the disciplines of architecture, landscape architecture, civil engineering and public health provided the nucleus of concerned professionals; beautification schemes and infrastructure works marked the early stages of public intervention in the 19th century. Architects, engineers and public health specialists were joined by economists, sociologists, lawyers and geographers as the complexities of the city's problems came to be more fully understood and public pressure mounted for their solution. Contemporary urban and regional planning techniques for survey, analysis, design and implementation developed from an interdisciplinary synthesis of these various fields, as did the practice of urban design.

Today, urban planning can be described as the collective management of urban development. It is concerned with the welfare of communities, control of the use of land, design of the built environment, including transportation and communication networks, and protection and enhancement of the natural environment. It is at once a technical and a political process which brings together actors from the public, private and community spheres. Planners participate in that process in a variety of ways, as designers and analysts, advocates and mediators, facilitating the search for equitable and efficient solutions to problems of urban growth and development.

McGill University was the first institution in Canada to offer a full-time planning program. An interdisciplinary program was established in 1947, in which students combined a master's degree in Urban Planning with one in a related field. An autonomous program was established in 1972. It became the School of Urban Planning in 1976, a unit within the Faculty of Engineering. It has strong links with the School of Architecture, which is housed in the same building.

Students come to the School from diverse backgrounds, the physical sciences, the traditional professions, such as architecture and engineering, and the social sciences. Alumni of the School work as planners and designers at various lev

The objective of the School is to produce qualified professional urban planners for the public and the private sectors. Training is provided at the postgraduate level; the degree offered is the Master of Urban Planning (M.U.P.). There are two formal specializations available: in Urban Design and in Transportation Planning. All M.U.P. students may also opt to spend a semester in Barbados as part of the Barbados Field Study Semester which focuses on Global Environmental Issues. Details concerning each of these concentrations may be seen at www.mcgill.ca/urbandesign, www.tram.mcgill.ca and www.mcgill.ca/bfss respectively.

Upon completion of the two-year program of studies, graduates are expected to have acquired basic planning skills, a broad understanding of urban issues, and specialized knowledge in a field of their own choice.

The program of study offered by the School is fully recognized by the *Ordre des Urbanistes du Québec* (O.U.Q.) and the Canadian Institute of Planners (C.I.P.). Graduates may become full members of the O.U.Q. and other provincial planning associations by completing their respective internship and examination requirements. Similar requirements must be met for admission to the American Institute of Certified Planners (A.I.C.P.) and other such organizations.

For details of the M.U.P. admission requirements and curriculum, consult the *Graduate and Postdoctoral Studies Calendar*, available at www.mcgill.ca/students/courses/calendars.

12.8.3 Undergraduate Courses in Urban Planning

The following courses taught by faculty in the School of Urban Planning are open to undergraduate students:

| | |
|-----|----------------------------|
| (3) | Montreal: Urban Morphology |
|-----|----------------------------|

Instructors

Marc-André Lechasseur; LL.B.(Sher.), LL.M.(Montr.)

Alain Trudeau; B.Sc.(UQAM), M.U.P.(McG.)

Adjunct Professors

David Farley; B.Arch.(McG.), M.Arch., M.C.P.(Harv.)

Mario Polèse; B.A.(CUNY), M.A., Ph.D.(Penn.)

Ray Tomalty; B.A., M.P.A..(Qu.), Ph.D.(Wat.)

Guest Lecturers

Daniel Hodder

Andrew Hoffmann

Paul Le Cavalier

Brenda Lee

Martin Wexler

Joshua Wolfe

12.9 Faculty of Engineering Related Programs

12.9.1 Bioresource Engineering

The Faculty of Engineering cooperates with the Faculty of Agricultural and Environmental Sciences in providing courses of instruction for a curriculum in agricultural and biosystems engineering to meet requirements for a professional degree awarded in the Faculty of Agricultural and Environmental Sciences. For details of the curriculum, see *Faculty of Agricultural and Environmental Sciences > Bachelor of Engineering (Bioresource) (B.Eng.(Bioresource)) - Major Bioresource Engineering (113 credits)*.

Some of the courses offered by the Department of Bioresource Engineering (subject code BREE) may be of interest to students in the Faculty of Engineering.

The Department of Bioresource Engineering is located in the Faculty of Agricultural and Environmental Sciences on the Macdonald campus:

Department of Bioresource Engineering
 Room MS1-027, Macdonald Stewart Building
 21,111 Lakeshore Road
 Ste. Anne de Bellevue, Quebec H9X 3V9
 Tel: 514-398-7773
 Fax: 514-398-8387

12.9.2 Department of Biomedical Engineering

Lyman Duff Medical Sciences Building
 3775 University Street
 Montreal, Quebec H3A 2B4
 Telephone: 514-398-8278

Some of the courses offered by the Department of Biomedical Engineering (subject code BMDE) may be of interest to Engineering students, and may be approved as complementary courses. The Faculty of Engineering also offers a Minor in Biomedical Engineering; for more information, see [section 12.10.2: Biomedical Engineering Minor](#).

12.10 Minor Programs

Minors are coherent sequences of courses taken in addition to the courses required for the B.Eng., B.S.E., or B.Sc.(Arch.) degree. Minors normally consist of 18 to 24 credits, allowing 9 to 12 credits of o

In general, B.Eng. and B.S.E. students may use courses from the Complementary Studies lists (Group A and Group B) in their program that are offered by the Faculty of Arts to satisfy some of these requirements. No more than 9 credits of these courses can be credited toward the Arts minor.

12.10.2 Biomedical Engineering Minor

Biomedical engineering can be defined as the application of engineering principles to medicine and the life sciences. Students in the Biomedical Engineering Minor take courses in life sciences (anatomy, biology, chemistry and physiology) and choose courses from area(s) Bioe(2)thn the BTj/F2 8.1 Tf()Tj/F1 8.1 Tf(neldof ebom

Complementary Courses

0-6 credits

Up to 6 credits in the B.Eng., B.S.E. or B.Sc.(Arch.) program can also be credited to the Minor, with the permission of the departmental adviser and approval of the Minor adviser. In particular, courses at the 200-level or higher that are prerequisites for certain specialization courses would be eligible, with permission of the Minor adviser. By careful selection of complementary courses, the Minor can be satisfied with 9 additional credits in the undergraduate program or a maximum of 12 credits overlap with the degree program.

12.10.3 Biotechnology Minor

Biotechnology can be defined as the science of understanding, selecting and promoting useful organisms and specific gene products for therapeutic purposes. It requires a broad comprehension of biology and engineering and detailed knowledge of at least one basic subject such as molecular genetics, protein chemistry, microbiology, or chemical engineering.

The Minor in Biotechnology, offered by the Faculties of Engineering and of Science, emphasizes an area relevant to biotechnology that is complementary to the student's main program. It is designed specifically for Chemical Engineering students; other Engineering students interested in taking this Minor should contact the Program Supervisor, Dr. Hugh Bennett (see below for contact information).

Students who are interested in this Minor should inform their academic adviser and the Program Supervisor in Year 1 and at the time of registration in Year 2. With the agreement of their academic adviser, students should submit their course list to the Program Supervisor, who will certify that the proposed program conforms to the requirements for the Minor.

The Biotechnology Minor is administered by the Faculty of Engineering Student Affairs Office, Engineering Student Centre, and by the Faculty of Science by Dr. Hugh Bennett, Program Supervisor.

Dr. Hugh Bennett

12.10.3.1 Bachelor of Engineering (B.Eng.) - Minor Biotechnology (for Engineering Students) (24 credits)

This minor is offered by the Faculties of Engineering and of Science for students who wish to take biotechnology courses that are complementary to their area. It has been designed specifically for Chemical Engineering students; other Engineering students who are interested in the Minor should contact the Minor Program Supervisor, Prof. Hugh Bennett (Sheldon Biotechnology Centre, Lyman Duff Building) or an adviser in the Student Affairs Office, Engineering Student Centre.

Faculty of Science (OT) 20, 3342 should submit to the

12.10.4 Chemistry Minor

The Departments of Chemistry and Chemical Engineering offer this Chemistry Minor, of particular interest to Chemical Engineering students, and a Chemical Engineering Minor, of interest to Chemistry students (described under the *Faculty of Science* > : *Bachelor of Science (B.Sc.) - Minor Chemical Engineering (24 credits)*). Students taking the Chemistry Minor complete 10 credits of required courses in physical and organic chemistry, and choose an additional 15 credits of complementary courses from the areas of inorganic, analytical, organic and physical chemistry.

Please consult the program coordinators for more information: Professor David Cooper (Chemical Engineering) and Dr. Gonzalo Cosa (Chemistry).

12.10.4.1 Bachelor of Engineering (B.Eng.) - Minor Chemistry (25 credits)

Revision, Fall 2010. Start of revision.

Please consult the program coordinator, Dr. Gonzalo Cosa, for more information about this minor.

A passing grade for courses within the Minor is a C.

Required Courses

10 credits

| | | |
|------------|-----|----------------------------------|
| CHEE 310* | (3) | Physical Chemistry for Engineers |
| CHEM 212 | (4) | Introductory Organic Chemistry I |
| CHEM 233* | (3) | Topics in Physical Chemistry |
| CHEM 234** | (3) | Topics in Organic Chemistry |

*Students select either CHEM 233 or CHEE 310

** or CEGEP equivalent

Complementary Courses

15 credits from the following lists, two

Physical Chemistry

| | | |
|-----------|-----|--------------------------------------|
| CHEM 345 | (3) | Molecular Properties and Structure 1 |
| CHEM 355 | (3) | Molecular Properties and Structure 2 |
| CHEM 393* | (2) | Physical Chemistry Laboratory 2 |
| CHEM 574 | (3) | Introductory Polymer Chemistry |

Revision, F

| | | |
|----------|-----|-------------------------------------|
| COMP 302 | (3) | Programming Languages and Paradigms |
| COMP 303 | (3) | Software Development |

3 credits from the following:

| | | |
|----------|-----|--------------------------------------|
| COMP 273 | (3) | Introduction to Computer Systems |
| ECSE 221 | (3) | Introduction to Computer Engineering |

3 credits from the following:

| | | |
|----------|-----|---|
| COMP 350 | (3) | Numerical Computing |
| MECH 309 | (3) | Numerical Methods in Mechanical Engineering |

0-3 credits from the following:

| | | |
|----------|-----|--------------------------------|
| COMP 251 | (3) | Data Structures and Algorithms |
|----------|-----|--------------------------------|

6-9 credits chosen from other computer science courses at the 300 level or higher.

Notes:

- A. COMP 203 and COMP 250 are considered to be equivalent from a prerequisite point of view, and cannot both be taken for credit.
- B. COMP 208 may be taken before COMP 250; however, it cannot be taken for credit in the same term or afterwards.
- C. COMP 396 (Undergraduate Research Project) cannot be taken for credit towards this minor.

Courses that make considerable use of computing from other departments may also be selected, with the approval of the School of Computer Science. Students should consult with their advisers about counting specific courses.

12.10.6 Construction Engineering and Management Minor

Students taking the Minor in Construction Engineering and Management complete 15 credits of required courses in management and law. Students choose complementary courses from the areas of either building structures or heavy construction, and from other construction- and management-related courses.

For further information about this minor and course selection, contact Professor L. Chouinard at 514-398-6446, Room 488, Macdonald Engineering Building.

12.10.6.1 Bachelor of Engineering (B.Eng.) - Minor Construction Engineering and Management (24 credits)

Note: This minor is open to B.Eng., B.S.E. and B.Sc.(Arch.) students.

All courses in the minor program must be passed with a grade of C or better.

For further information, contact Professor L. Chouinard at 514-398-6446, Room 488, Macdonald Engineering Building.

9 credits

| | | |
|--------------|-----|---|
| ECON 209* | (3) | Macroeconomic Analysis and Applications |
| ECON 230D1** | (3) | Microeconomic Theory |
| ECON 230D2** | (3) | Microeconomic Theory |

* This requirement is waived for students who choose ECON 330D1/ECON 330D2 from the list of complementaries. Students may not take both ECON 209 and ECON 330D1/ ECON 330D2.

** Students may, with consent of instructor, take ECON 250D1/ ECON 250D2 Introduction to Economic Theory: Honours, in p1 0 0 90 1 7di30D1**E1 credits

| | | |
|----------|-----|--|
| ECON 426 | (3) | Labour Economics |
| ECON 434 | (3) | Current Economic Problems |
| ECON 440 | (3) | Health Economics |
| ECON 447 | (3) | Economics of Information and Uncertainty |
| ECON 468 | (3) | Econometrics 1 - Honours |
| ECON 469 | (3) | Econometrics 2 - Honours |
| ECON 525 | (3) | Project Analysis |

| | | |
|----------|-----|---|
| CIVE 225 | (4) | Environmental Engineering |
| CIVE 323 | (3) | Hydrology and Water Resources |
| CIVE 421 | (3) | Municipal Systems |
| CIVE 428 | (3) | Water Resources and Hydraulic Engineering |
| CIVE 430 | (3) | Water Treatment and Pollution Control |
| CIVE 451 | (3) | Geoenvironmental Engineering |
| CIVE 550 | (3) | Water Resources Management |
| CIVE 555 | (3) | Environmental Data Analysis |
| CIVE 572 | (3) | Computational Hydraulics |
| CIVE 573 | (3) | Hydraulic Structures |
| CIVE 574 | (3) | Fluid Mechanics of Water Pollution |
| CIVE 577 | (3) | River Engineering |
| CIVE 584 | (3) | Groundwater Engineering |
| MECH 447 | (3) | Combustion |
| MECH 526 | (3) | Manufacturing and the Environment |
| MECH 534 | (3) | Air Pollution Engineering |

T

| | | |
|----------|-----|---|
| ECON 326 | (3) | Ecological Economics |
| ECON 347 | (3) | Economics of Climate Change |
| EPSC 549 | (3) | Hydrogeology |
| GEOG 200 | (3) | Geographical Perspectives: World Environmental Problems |
| GEOG 201 | (3) | Introductory Geo-Information Science |
| GEOG 203 | (3) | Environmental Systems |
| GEOG 205 | (3) | Global Change: Past, Present and Future |
| GEOG 302 | (3) | Environmental Management 1 |
| GEOG 308 | (3) | Principles of Remote Sensing |
| GEOG 321 | (3) | Climatic Environments |
| GEOG 404 | (3) | Environmental Management 2 |
| MIMM 211 | (3) | Introductory Microbiology |

12.10.9 Minor in Environment

Environmental studies involve the interactions between humans and their natural or technological environment. Environmental problems are frequently comprehensive and complex, and their satisfactory solutions require the synthesis of humanistic, scientific, and institutional knowledge.

The Minor in Environment is offered and administered by the McGill School of Environment (MSE). Inquiries should be directed to Ms. Kathy Roulet, MSE Program Adviser; email: kathy.roulet@mcgill.ca, or telephone: 514-398-4306.

Since the program comprises a total of 18 credits for the Minor, additional credits beyond those needed for the B.Eng. degree are required. Students wishing to receive the Minor should prepare a program and have it approved by both their regular Engineering adviser and the MSE adviser. For program details, see *McGill School of Environment > Minor in Environment*.

12.10.10 Minor Programs in Finance, Management, Marketing, and Operations Management

Prerequisite: None

Many engineers begin to assume management functions within a few years of graduation. They can, at this stage, take up the study of economics, behavioural science and other management subjects. Students wishing to include such studies in their undergraduate program can take suitable courses from Engineering and Management.

Courses are available, subject to timetable requirements, from the core program of the Desautels Faculty of Management. Some courses from the Management core program have considerable overlap with Engineering courses and thus are not available to Engineering students. Further information is available at www.mcgill.ca/engineering/degrees/minors.

A student embarking on a Minor must be prepared to take credits additional to their engineering program. Students may choose the required Complementary Studies (Humanities and Social Sciences, Management Studies and Law) course(s) (maximum of 6 credits) in his/her program so that they count toward both their engineering program and the Minors where applicable. More information about Complementary Studies is given in the B.Eng./B.S.E. program section.

Students considering this Minor should consult an adviser or the Faculty of Engineering Student Affairs Office, Engineering Student Centre, FDA 22.

Students must have a CGPA of 3.0 or better to be considered for this Minor.

Students planning to take any course with statistics as a prerequisite must have completed MGCR 271 (Business Statistics) or an equivalent course approved by the BCom Student Affairs Office.

Detailed information on this Minor can be found under *Desautels Faculty of Management > Minors for Non-Management Students*.

12.10.11 Materials Engineering Minor

Students taking the Materials Engineering Minor complete 15 credits of required courses in materials science, materials engineering, electronic properties of materials, metallic and ceramic powders processing, and applications of polymers, and choose three complementary courses in other areas related to materials engineering.

For more information regarding this Minor, contact the minor coordinator, Prof. M. Brochu, Room 2640, Wong Building.

12.10.11.1 Bachelor of Engineering (B.Eng.) - Minor Materials Engineering (24 credits)

Engineering students may obtain a Materials Engineering Minor by completing 24 credits chosen from the required and complementary courses listed below. By a careful selection of complementary courses, Engineering students may obtain this minor with a minimum of 15 additional credits.

For further information, please contact the coordinator, Prof. M. Brochu, Room 2640, Wong Building.

Required Courses

15 credits**

| | | |
|-----------|-----|---|
| CHEE 380* | (3) | Materials Science |
| CHEE 484 | (3) | Materials Engineering |
| MIME 260* | (3) | Materials Science and Engineering |
| MIME 367 | (3) | Electronic Properties of Materials |
| MIME 465 | (3) | Metallic and Ceramic Powders Processing |

* Students choose either CHEE 380 or MIME 360.

**Note: Another 3-credit MIME course will be added to the Required Courses list for 2010-2011, pending University approval. Please see Prof. M. Brochu for more information.

Complementary Courses

9 credits from the following:

| | | |
|----------|-----|--|
| CHEE 487 | (3) | Chemical Processing: Electronics Industry |
| ECSE 545 | (3) | Microelectronics Technology |
| MECH 530 | (3) | Mechanics of Composite Materials |
| MIME 360 | (3) | Phase Transformations: Solids |
| MIME 512 | (3) | Corrosion and Degradation of Materials |
| MIME 560 | (3) | Joining Processes |
| MIME 561 | (3) | Advanced Materials Design |
| MIME 563 | (3) | Hot Deformation of Metals |
| MIME 566 | (3) | Texture, Structure & Properties of Polycrystalline Materials |
| MIME 569 | (3) | Electron Beam Analysis of Materials |

12.10.12 Mathematics Minor

Students in the Minor in Mathematics for Engineering students complete 18 credits of mathematics courses (subject code MATH), not including mathematics courses that are required in their engineering program (or equivalent courses) and choose 6 credits from other mathematics-related courses.

In addition to an Engineering adviser, each student in the Minor must have an adviser designated by the Department of Mathematics and Statistics, normally beginning in Year 2. The selection of courses for the Minor is to be done in conjunction with the Minor adviser. Please consult the Department of Mathematics and Statistics for an adviser.

12.10.12.1 Bachelor of Engineering (B.Eng.) - Minor Mathematics (24 credits)

Note: The Mathematics Minor is open to all students in the Faculty of Engineering (B.Eng., B.S.E. and B.Sc.(Arch.).

This minor for Engineering students requires satisfactory passes in 24 credits of approved courses in Mathematics.

In addition to an Engineering adviser, each student in the minor program must have an adviser designated by the Department of Mathematics and Statistics, normally beginning in their U2 year. The selection of courses is to be done in conjunction with the minor adviser. Please consult the Department of Mathematics and Statistics for an adviser.

Course Selection

At least 18 credits must be chosen from the Mathematics and Statistics courses approved for the Mathematics Major or Honours program, or from the following courses:

| | | |
|----------|-----|----------------------------------|
| MATH 249 | (3) | Honours Complex Variables |
| MATH 363 | (3) | Discrete Mathematics |
| MATH 381 | (3) | Complex Variables and Transforms |

The remaining credits may be chosen from mathematically allied courses.

The following courses cannot be used towards the Minor:

| | | |
|----------|-----|---|
| MATH 222 | (3) | Calculus 3 |
| MATH 223 | (3) | Linear Algebra |
| MATH 247 | (3) | Honours Applied Linear Algebra |
| MATH 248 | (3) | Honours Advanced Calculus |
| MATH 262 | (3) | Intermediate Calculus |
| MATH 263 | (3) | Ordinary Differential Equations for Engineers |
| MATH 264 | (3) | Advanced Calculus for Engineers |
| MA | (3) | Applied Linear Algebra |

| | | |
|----------|-----|-----------------------------------|
| MIME 419 | (3) | Surface Mining |
| MIME 422 | (3) | Mine Ventilation |
| MIME 426 | (3) | Development and Services |
| MIME 520 | (3) | Stability of Rock Slopes |
| MIME 521 | (3) | Stability of Underground Openings |
| MIME 526 | (3) | Mineral Economics |

List B: Mechanical Engineering

0-6 credits from the following:

| | | |
|----------|-----|--|
| MECH 497 | (3) | Value Engineering |
| MECH 554 | (3) | Microprocessors for Mechanical Systems |
| MECH 557 | (3) | Mechatronic Design |
| MECH 572 | (3) | Introduction to Robotics |
| MECH 573 | (3) | Mechanics of Robotic Systems |
| MECH 577 | (3) | Optimum Design |

List C: Civil Engineering

0-6 credits from the following:

| | | |
|----------|-----|---|
| CIVE 416 | (3) | Geotechnical Engineering |
| CIVE 451 | (3) | Geoenvironmental Engineering |
| CIVE 462 | (3) | Design of Steel Structures |
| CIVE 463 | (3) | Design of Concrete Structures |
| CIVE 527 | (3) | Renovation and Preservation: Infrastructure |

List D: Chemical Engineering

0-6 credits from the following:

| | | |
|----------|-----|-----------------------|
| CHEE 453 | (4) | Process Design |
| CHEE 455 | (4) | Process Control |
| CHEE 484 | (3) | Materials Engineering |

12.10.14 Physics Minor

Students in Honours Electrical Engineering taking the Physics Minor take 9 credits of required courses in thermal physics and honours quantum physics and choose three other physics courses (subject code PHYS).

Interested students should contact the Department of Physics concerning this Minor.

12.10.14.1 Bachelor of Engineering (B.Eng.) - Minor Physics (18 credits)

Revision, Fall 2010. Start of revision.

Students in Honours Electrical Engineering may obtain this minor as part of their B.Eng. degree by completing 18 credits of physics courses, as listed below.

Please consult the Department of Physics for an adviser.

Required Courses

9 credits

| | | |
|----------|-----|-----------------|
| PHYS 253 | (3) | Thermal Physics |
|----------|-----|-----------------|

| | | |
|-----------|-----|---------------------------|
| PHYS 357* | (3) | Honours Quantum Physics 1 |
| PHYS 457* | (3) | Honours Quantum Physics 2 |

* Students who take PHYS 357 and PHYS 457 can omit PHYS 271 from their normal Electrical Engineering program.

Complementary Courses

9 credits from the following:

| | | |
|----------|-----|-------------------------------|
| PHYS 351 | (3) | Honours Classical Mechanics 2 |
| PHYS 362 | (3) | Statistical Mechanics |
| PHYS 432 | (3) | Physics of Fluids |
| PHYS 514 | (3) | General Relativity |
| PHYS 551 | (3) | Quantum Theory |

12.10.16 Software Engineering Minor

This Minor will prepare an engineering student for a career in software engineering. It will provide a foundation in basic computer science, computer programming and software engineering practice.

Students considering this Minor should consult with a faculty adviser in the Student Affairs Office, Engineering Student Centre, Frank Dawson Adams, Suite 22.

12.10.16.1 Bachelor of Engineering (B.Eng.) - Minor Software Engineering (24 credits)

Revision, Fall 2010. Start of re vision.

The Software Engineering Minor will prepare an engineering student for a career in software engineering. It will provide a foundation in basic computer
